Item No. 11

The Company has received approval from the Corporate Debt Restructuring (CDR) Empowered Group under the CDR framework of the Reserve Bank of India and obtained a provisional letter of approval from CDR Cell, for the financial restructuring of the debts with respective lenders of the Company. Accordingly, the Company would be able to meet out its financial obligations with the lenders under a restructured CDR package and can pay-off the liabilities over a period of time. Further, the sugar scenario has shown upward trend and average sugar price realization has improved with the change in sugar dynamics, in anticipation of the tightened supply and demand of sugar. The Board is confident that with improvement of the average sugar/ethanol realization in the current season, there is an improved outlook of the Uttar Pradesh sugar industry. The promoters have already agreed to infuse the funds in the Company as per the terms under the CDR arrangement with the lenders.

Hence, your directors have proposed to offer the securities of the Company for subscription to the existing equity shareholders of the Company on the rights basis so that the promoters and other existing members may also subscribe to the shares, being offered in the ratio as may be determined by the Board at a later stage. The offer document will be sent to those members who shall be entitle to subscribe the shares as on the record date to be announced by the Board in this regard. The additional funds to be raised through Rights Issue will be utilized in the manner as may be conducive to the business requirements. The additional measures are being taken for the revival of the Company and utilization of funds towards cane development/management, better sugar yields/recoveries and repayment/re-scheduling of long term loans with the fulfilment of the conditions under CDR directives. The overall productivity of the Company is also expected to improve, which will have a positive impact on the profitability in the coming sugar seasons.

Considering the financial position of the Company, and the difficulties being faced by the Company, infusion of fresh capital in a time bound manner is very critical for revival of the Company and with infusion of promoters' contribution as well by the subscription to the rights issue, the Company envisages coming out of the tight financial position.

The Companies Act, 2013 (the Act) along with Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009 (SEBI ICDR Regulations) prescribes the manner in which listed entities may raise further capital by way of Rights Issue pursuant to satisfaction of the conditions specified therein. Section 62 of the Act provides, inter alia, that when it is proposed to increase the issued capital of the Company by allotment of further equity shares, such further equity shares shall be offered to the existing shareholders of such Company in the manner laid down therein.

Therefore, it is proposed to create, offer, issue and allot equity shares to the then existing members as on the record date in the ratio to be determined by the Board on rights basis aggregating up to ₹100,00,00,000 (Rupees One Hundred Crore only) under the provisions of the Act read with the SEBI ICDR Regulations. The detailed terms and conditions of the issue as and when made will be determined by the Board of Directors in consultation with the Merchant Bankers, Lead Managers, Advisors, Underwriters and other experts in accordance with the applicable provisions of the law.

Since, the pricing and other terms of the offering cannot be decided at present, an enabling resolution is proposed to be passed to give adequate flexibility and discretion to the Board to finalise the terms of the Rights Issue in accordance with the

SEBI (ICDR) Regulations as may be amended from time to time, and the cut-off/record date in this regard shall be the date on which the Board decides to open the issue of securities or such other time as may be permitted/allowed under applicable laws from time to time.

Since, the Resolution proposed under item number 11 of this notice may result in the issue of fresh equity shares of the Company to members and/or to persons other than members of the Company, consent of the members is being sought pursuant to the provisions of Section 62 and other applicable provisions of the Act as well as applicable rules notified by the Ministry of Corporate Affairs and in terms of the provisions of the SEBI ICDR Regulations read with the Listing Agreements executed by the Company with the stock exchanges, where the equity shares of the Company are listed.

The Resolution, if passed, will have the effect of allowing the Board to offer, issue and allot equity shares subject to availability of regulatory, bankers and lenders approvals, if any, to the existing equity shareholders or their renounee(s), who may not be the members of the Company. The equity shares, if any, shall rank pari passu in all respects, including the right to dividend, with the then existing equity shares of the Company. The allotment of equity shares pursuant to the Resolution proposed under Item No. 11 shall be completed within such time as prescribed under the Act, read with SEBI ICDR Regulations and other applicable laws.

The Board recommends the resolution set forth under item number 11 for the approval of the members as an Ordinary Resolution.

None of the Promoters, Directors, Key Managerial Personnel or their relatives are in any way concerned or interested, financially or otherwise, in passing of the aforesaid resolution except to the extent of their shareholding as members of the Company.

Item No. 12

The Erstwhile Simbhaoli Sugars Limited (ESSL) had been availing financial assistance, from the lenders for the business requirements of the Company. With the implementation of the Scheme of Amalgamation, all the liabilities have been transferred to the Company. In addition, the proposal for business restructuring and debt realignment of the Company have been approved by the Corporate Debt Restructuring (CDR) Empowered Group and a rework package has been agreed to with the lenders of the Company.

The proposed resolution is an enabling resolution under the provisions of the Section 62(3) and other applicable provisions of the Act which provides that in the event of default or upon exercise of an option provided under the lending arrangements in the facility agreements, the banks may subscribe to the share capital by conversion of their outstanding facilities subject to the compliance of the relevant provisions of laws as may be applicable to the Company from time to time.

The Board recommends the resolution set forth under item number 12 for the approval of the members as a Special Resolution.

None of the Promoters, Directors, Key Managerial Personnel or their relatives are in any way concerned or interested, financially or otherwise, in passing of the aforesaid resolution except to the extent of their shareholding as members of the Company.

Therefore, the Transferee Company will be required to replace the encumbrances, charge and/or rights on the immovable properties with equitable and corresponding encumbrance, charge and/or right over assets under the terms of fresh loan covenants entered into with the lenders. I. GENERAL INFORMATION:

(1) Nature of industry

Nature of Industry is manufacturing and marketing of sugar, alcohol, bio fuel, bio power and their allied products.

(2) Financial performance based on given indicators

The Uttar Pradesh based sugar companies have been facing financial difficulties on account of high sugar cane prices, lower realization of sugar and high finance costs during the last 3-4 years. Business of the Companies, mainly pertaining to the sugar segment, has been incurring cash losses leading to erosion of its net-worth and current liabilities were higher than the current assets. To overcome the situation, in previous years, the Company has taken and implemented a number of measures, including business and financial restructuring of its business divisions for de-risking the businesses and improving financial position. At the end of the 2013-14 crushing season, the Hon'ble High Court of Judicature at Allahabad, directed the State to take action against the sugar mills for recovery of the outstanding

cane dues as statutory liabilities, and under directions of the Court, the State administration took control over the sugar stocks, forced the sugar mills to sell the sugar and initiated multiple coercive actions. Accordingly, large quantities of sugar stocks have been sold as per the instructions of the State, which has led to crash in sugar prices and continuation of cane arrears successively.

The Company has taken various steps to improve its financial position by adopting certain cost cutting measures, manpower planning diversification of business activities and change in the management approach to run the business in most efficient manner. Other costs have also been brought down in all the sections across the Company. In spite of the difficulties being faced, the Company has paid the entire sugar cane dues for the sugar season 2013-14.

During the year, the power expansion project of Simbhaoli cogeneration plant by 28 mw from existing 34 mw to 62 mw has been completed. Now, total power generation capacity of SPPL has reached to 100 mwh.

- ii. Uniworld Sugars Private Limited (USPL) is a joint venture company between Simbhaoli Sugars Limited and ED&F Man Sugar Ltd, England, UK, having a 1,000 tpd (300,000 mt per annum) capacity sugar refinery near Kandla Port, Gujarat. III. Other information:

Reasons of loss or inadequate profits: Over the last few years the Uttar Pradesh based sugar companies have been facing financial difficulties on account of high sugar cane prices,

low realization of sugar and high finance cost. The critical situation has placed new challenges for the Company. Now, with various financial and other measures, the Company has successfully amalgamated the sugar and alcohol businesses in a consolidated entity with an objective to improve cost efficiencies and synergies which may also add value to the business operations of the Company. Simbhaoli Sugars has been affected by the sharp Industry downturn, however the Company has been operating in an efficient manner.

The operations of the distillery of Simbhaoli Spirits Limited were discontinued as per the directions given by Hon'ble National Green Tribunal since February 2014. Moreover, a penalty of ₹5 crore was also imposed on the Company. During the year 2014-15 and part of 2015-16, there was no business operations, and production in Simbhaoli Spirits Limited.

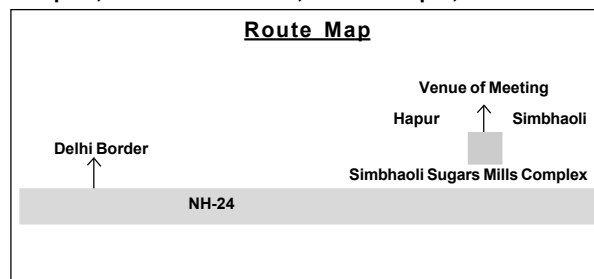

The Company has invested in Simbhaoli Power Pvt Ltd and Uniworld Sugars Private Limited under joint venture arrangements which are going through expansion that requires further investments for capital expenditure. There is a delay in deriving the projected returns from these subsidiary/associate companies.

Steps taken or proposed to be taken for improvement:

The Company runs an extensive cane development programme in the command area of its sugar units for achieving sustainability in the raw material quantity and quality. This programme is aimed at co-creating and sharing with farmers through a sustainable boost in farm productivity, which translates into increased revenue for farmers, and increased sugar recovery, which directly reduce the Company's cost of production. A multi-cropping system is introduced in most of the command areas and the Company is acting as facilitator throughout the entire crop cycle for multiple crops, encouraging farmers to cultivate sugarcane with other crops which will improve revenue for farmers. These initiatives are more sustainable and environmentally friendly.

Expected increase in productivity and profits in measurable terms. The Scheme of Amalgamation has been implemented as a part of the business restructuring, which will un-lock the value of the business segments and improve the overall business valuations. The gross turnover of the Company is ₹785.64 crore and consolidated to the group is ₹1107.07 crore as per audited accounts as on March 31, 2016. The improvement in margins through cost cutting and expected increase in the sugar realizations will result in the improved profitability over a period of time. The projected result from the subsidiary/associate companies may also be realised once, there companies start at the optimum capacities and unlocking their values. With the above measures, the Company is confident to turn around and achieve positive margins in future.

Route Map of the venue of the 5th Annual General Meeting of the Company scheduled to be held on Monday, September 26, 2016 at 10:00 AM at Registered Office of the Company at Officers Club, sugar mill complex, Simbhaoli-245 207, District Hapur, Uttar Pradesh

CHAIRMAN'S MESSAGE

Dear Stakeholders,

Financial year 2015-16 provided us a much-needed glimmer of hope. Signs of the beginning of the cyclical turnaround of the industry, timely policy decisions by the Government and significant operational and financial improvements in the Company have collectively driven this turnaround.

Sugar is a cyclical business and this past year represented the beginning of an upward turn in the cycle. Sugar production in India in the sugar year 2015-16 stood at 25.1 mmt, down by 11.30% from a year ago. The domestic sugar industry has started showing signs of improvement with sugar prices moving upwards from January 2016 onwards.

On the policy front, the Central and UP State Governments introduced key policy initiatives such as the imposition of 40% import duty on sugar, production subsidy of ₹4.50 per quintal of cane crushed on compulsory export, UP State subsidy of ₹28.60 per quintal directly to the farmers for the sugarcane they supplied to mills during the 2014-15 crushing season, raising the ethanol blend percentage from 5 to 10%, achieving 5% implementation of the Ethanol blending program for the first time, removal of excise

duty on ethanol supply and other such measures.

Internally, we went back to the basics and were laser focused on our core competencies, namely, our expertise in conversion of sugarcane into high-quality products and other by-products for industrial consumers and end users. Improving asset utilization by production of high quality premium range sugar and conversion of alcohol into ethanol for supplying to the oil marketing companies was the prime focus of our business operations.

People ultimately are at the core of any major change or successful turnaround. Your Company has therefore been continuously working on inculcating a culture of multi-tasking, training, skill development and mentoring to ensure a committed and motivated workforce, in addition to achieving significant man-power rationalization.

We have been following a very focused and consolidated approach to make best use of this changing business scenario. Key initiatives in this direction taken in the previous year were:

1. Improvement in the operational efficiencies comprising of the increase in recovery, and optimum utilization of capacities in the mix of sugar, power and alcohol segments.
2. Approval of the Scheme of Amalgamation as sanctioned by the Hon'ble High Court of Judicature at Allahabad.
3. Approval of the Debt Realignment Scheme with the lenders of the Company to restructure the outstanding liabilities under the Corporate Debt Restructuring arrangement (Implementation under process).
4. Consent from the Pollution Control Boards to resume the operations of Simbhaoli distillery after compliance of the order passed by Hon'ble National Green Tribunal.
5. Completion of expansion projects with power generation capacities to 100 MWH in the subsidiary company viz. Simbhaoli Power Private Limited.

In the coming year, your directors are confident of further improving its financial situation. We continue to believe that the long-term solution to the problem is establishing linkage between the sugarcane and sugar price as recommended by the Rangarajan Committee in 2012 with the inputs of all stakeholders. The Government's early implementation of the aforesaid recommendations is critical to this industry's sustainable financial success.

Going forward, our goal is to become the most operationally efficient player in the industry, complete our ongoing financial de-leveraging efforts, continue to bring together the best team of professionals and technologists and focus on delivering shareholders value over the long term.

With Best Wishes

BOARDS' REPORT

To the members of Simbhaoli Sugars Limited

Your directors have pleasure in placing the fifth Boards' report together with management discussion and analysis report for the financial year ended on March 31, 2016.

MANAGEMENT DISCUSSION AND ANALYSIS

International Sugar Industry

Global sugar balance is expected to enter into a sizable deficit of 7.6 million metric tons (mmt) in 2015-16 season, after 5 years of consecutive surplus. Sugar production globally has stagnated in the recent years with reduction in Brazil, India, the European Union, and Ukraine more than offsetting gains in Australia, Russia, and Turkey. On the other hand, sugar consumption is seen rising 1.5% per year in 2015 and 2016.

During the year 2015-16, in Thailand and India, sugarcane production was hit by dry weather, which is associated with the El Nino effect. Thai sugar production may reach to an aggregate 10.0 mmt in 2015-16 season, which is 11.5 per cent lower than record 11.3 mmt of sugar produced in the 2014-15 season. Indian production is also being seen lower by 3.2 mmt to 25.1 mmt playing a pivotal role in influencing the global market. Adverse weather conditions triggered production downgrades for China with total output now expected at 9.4 mmt.

Sugar prices in New York have rebounded by nearly 43% since reaching a seven-year low in August 2015, after El Nino cut the sucrose contents in sugar cane grown in Brazil as well as yields in Thailand and India.

Domestic Sugar Industry Scenario

India, the world's biggest consumer of sugar, is likely to produce 25.1mmt of the sweetener in the 2015-16 sugar

year ending on September 30, down 11.3% from a year ago. A few sugar mills were continuing their crushing operations, while most of the sugar mills have closed the operations in April 2016. The Country's sugar production data is given hereunder:

(fig. in mmt)

Source: ISMA estimates

Considering the number of sugar mills, which are in operation as on April 30, 2016, and cane availability in these states, sugar production in the current season is expected to be just above 25.1 mmt by the end of September 2016. However, with the carry forward of 9.1 mmt from previous season and estimated domestic consumption of 25.6 mmt and exports of 1.5 mmt, sugar mills would have a carry-over stock of 7.1 mmt at the end of the current season. Hence, the Indian sugar industry has been turning around with effect from the second half of FY 2015-16 with increase in sugar prices and lower cost of production due to higher sugar recovery in U.P., where the sugar mills have produced 6.8 mmt till April 30, 2016 as compared to 7.0 mmt last year.

Maharashtra/Karnataka (high yield states) received below normal rains in 2015 with consequent yield losses in sugar production. Maharashtra mills produced 8.4 mmt of sugar till April 30, 2016 as compared to 10.4 mmt last year and Karnataka mills produced 4.0 mmt compared to 4.8 mmt last year.

Government of India notified MIEQ (Minimum Indicative Export Quota) of 3.2 mmt to be exported during 2015-16 sugar season. Against this, 1.44 mmt of sugar have been exported till April, 2016. Since, sugar prices in the domestic market have improved and exports from India at the current global prices are not viable, it is expected that total export for the current season will be 1.5 mmt.

Price Trend

A mix of factors, such as better recoveries, government's mandatory export quota, successful ethanol blending programme and lower production forecast for the next season have led to better business prospects for the sugar

industry and improvement in domestic prices starting from January, 2016.

The drier than normal weather conditions seen so far in 2016, although positive for the progress of the harvest, is exacerbating water shortages (particularly in central/western regions) with potential negative impact on new crop planting. The projected fall in output by 8-10% in next season will reduce the sugar stock, which may result in the improvement and a constant demand for consumption, of sugar prices in subsequent year.

Sugarcane

The fair and remunerative price (FRP) of sugarcane for sugar season 2015-16 is fixed at ₹230 per quintal, linked to basic recovery at the rate of 9.5%, subject to premium of ₹2.42 per qtl. for every 0.1 percentage point increase in recovery above that level.

Major producers such as Uttar Pradesh, Tamilnadu, Haryana, Punjab and Uttarakhand continued with their sugarcane pricing policies as per the past practices of announcing State Advised Prices (SAPs), whereas states like Maharashtra and Karnataka are considering rationalization of their sugarcane pricing by linking it to the sugar prices.

As compared to the cane price arrears of 2015-16 sugar season of over ₹21,800 crore as on April 2015 last year, cane price arrears during the current season are lower at about ₹13,300 crore. With the improvement in domestic market, it is expected that cane price payments to the farmers will improve and arrears will come down substantially further in the next few months.

As per the agriculture ministry's second advance estimates, sugarcane production is estimated to decline to 346.39 mmt in 2015-16 crop year (July-June), which is lower by 15.95 million tonnes than its production during 2014-15. This is primarily due to deficient monsoon rainfall during Kharif crops and Rabi crops due to shortage of water in reservoirs and relatively warmer winter.

Domestic Ethanol Industry

Government decided to boost ethanol production by making 10% mandatory blending with petrol from October 2015. To

boost the supply, Government replaced procurement of ethanol based on a benchmark price decided by Oil Marketing Companies (OMCs) by a new mechanism of uniform price of ethanol declared for each sugar year. The delivered price of ethanol has been fixed in the range of ₹48.50 to ₹49.50 per litre, depending upon the distance of sugar mill from the depot/installation of the OMCs. The government has removed the excise duty on ethanol supplied for blending for 2015-16 onward. This would increase in net realization by around ₹5/litre of ethanol.

The total quantity of ethanol procured by the OMCs for the sugar season 2014-15 (December 2014 to November 2015) is approx. 67 crore litres. This is against the contracted quantity of 80 crore litres, which works to 82.5% and the country achieved 2.5% ethanol blending with petrol.

During the current season 2015-16 (till November 2016), OMCs have finalised total ethanol quantity of 135 crore litres against the total requirement of 265 crore litres to meet the 10% blending. It means that the country will be able to achieve 5% blending for the first time in the history of ethanol blending with petrol programme.

Government Policies

Policy related decisions taken during the year under review are:

April 2015: In order to improve the price sentiments relating to sugar, the Government decided to take the following steps:

- The duty on import of sugar under the Open General License (OGL) is increased from 25 to 40%.
- The Duty Free Import Authorization Scheme (DFIA), for sugar is withdrawn to prevent flow of sugar made from such duty free imports in the domestic markets.
- The period for discharging export obligations under the Advanced Authorization Scheme for sugar is reduced to six months.
- Removal of excise duty on ethanol supplied for blending, which was exempted and the price benefit is passed on to the sugar mills/distilleries.

June 2015: Provisions for the assistance from banks as soft loans to the extent of ₹6000 crore to the sugar industry with a one year moratorium towards clearance of arrears of cane dues, to those units, which have cleared at least 50 percent of their outstanding arrears before June 30, 2015.

September 2015: Notification for factory-wise allocation of 40 lac tons of sugar for exports during 2015-16 sugar season.

December 2015: Production subsidy at the rate of ₹4.50 per quintal of cane crushed to offset cane cost, which shall be paid directly to the farmers on behalf of the mills and be adjusted against the cane price payable to them towards FRP including arrears relating to previous years. This incentive will be available to those mills, which have exported at least 80% of the targets notified under the MIEQ and in case of mills having distillation capacities to produce ethanol have achieved 80% of the targets notified by the Department under the Ethanol Blending Programme (EBP).

April 2016: States are allowed to impose and enforce stock limits to check the price rise in sugar to regulate supply, distribution, storage and trade of sugar, which may bring down sugar prices to reasonable levels.

In this regard, November 26, 2015 was fixed as the Record date to determine the shareholders, who would be entitled to the shares of the Amalgamated Company and accordingly, 3,74,79,020 equity shares were issued and allotted in pursuance to the Scheme.

Change of Name

Pursuant to the Scheme, the name of the Company stands changed to "Simbhaoli Sugars Limited" from "Simbhaoli Spirits Limited" with effect from November 13, 2015.

Sugarcane price arrears

Over the last few years, the Company and erstwhile SSL have been incurring cash losses affecting their liquidity. The Uttar Pradesh based sugar companies have been facing financial difficulties on account of high sugar cane prices, lower realization of sugar and high finance cost. However, with various initiatives by the management, including business and financial restructuring of the business and steps being taken by the State and Central Governments to strengthen the sugar industry, the Company would turn around this situation in the near future and the business operations of the Company are sustainable and viable.

Impact of the industry scenario on the business

In the situation of constrained working capital, the Company has completed 8386 tonnes white sugar export out of total 20,000 tonnes export obligation required against the import of raw sugar made by the Company during previous years. The Company has applied for extension of time to complete its obligation.

The sugar industry in the state of Uttar Pradesh had been passing through a very difficult phase and had incurred heavy cash losses consistently for the last four years on account of fixing of high State Advised Price (SAP) for sugarcane without giving due consideration to the cost of production/ price of sugar/ paying capacity of the sugar mills. On the other hand, the sugar prices did not increase in the same proportion resulting in negative margins as much that sugar prices were not sufficient enough for cane payment alone. The coercive actions by the local administration often affect the operations, dispatches of sugar and inconsistency in cash flows.

However, the Company's current sugar operations have improved over the previous seasons and are expected to improve further in the next season on account of the development initiatives taken. Further, sugar industry has started moving in the positive directions and alcohol business is also growing positively. The ethanol industry is also expecting to take advantage of the world ethanol demand with the increase in production and supply to outside India.

The domestic sugar industry has started showing signs of improvement with the implementation of various measures taken by the Central and State governments having a direct impact on the business of the Company, which includes:

- Mandatory blending of ethanol with petrol to be doubled from 5 to 10%. Current year prices are ₹48.50 per litre.
- Increase in import duty to 40% to discourage import of sugar.
- Export duty of 20% on export of white sugar owing to limited supply in the country.

In addition, the Company has improved its operational efficiencies with the increase in the recovery vis-à-vis last 2 sugar seasons. It has emerged as one of the largest sellers of Specialty Sugars, which includes sachets, consumer packets, pharma sugar etc under its flagship brand TRUST, which commands substantial premium over and above the bulk sugar prices. Further, in current situation, the Company has rationalized its administrative, processing and procurement costs.

Outstanding dues of the financial institutions

The Company has proposed a Debt Realignment Scheme under the Corporate Debt Restructuring (CDR) mechanism of the Reserve Bank of India (CDR Scheme) with the lenders of the Company in consortium under which it has been able to restructure the outstanding liabilities comprising of conversion of loans to term loans including restructuring of the farmer financing and infusion of funds through fresh term loan. The Empowered Group, has approved the said Scheme. The management is confident that implementation of the Scheme with the lenders will be completed within stipulated time. Accordingly, the Company has accounted for all its debts obligations, including classification of current and non-current liabilities giving effect to the approved Scheme in these financial statements. The auditors have drawn attention to this in their audit report on the financial statements for the year ended March 31, 2016, without modifying their opinion.

Further, the CDR package, inter alia mandates for infusion of long term funds by the Promoters. Accordingly, the promoters have commenced the process for infusion of funds in the Company and have approached the Company to initiate the procedure for issuance and allotment of securities in compliance with the applicable laws.

Distillery Operations

The Hon'ble National Green Tribunal, New Delhi (NGT),

upheld a complaint against the Simbhaoli Distillery alleging non-fulfilment of certain conditions on pollution and effluent discharge. Accordingly, the operations of the Simbhaoli distillery plant were closed since February 20, 2014. The Company has taken the mitigation steps in this regard and after obtaining the consent from the Central Pollution Control Board (CPCB) and Uttar Pradesh Pollution Control Board (UPPCB), the distillery resumed its operations after 20 months of shut down.

Branding

The Company has been consistent in developing its sugar brand, 'Trust'. The sales and marketing infrastructure development exercises for distribution through modern retail and wholesale trade channels have been further strengthened during the year. The market area of 'Sipp' fruit drink mix has been further expanded. Trust branded sugar sachets have created vast acceptability and leadership in the hospitality industry. Appropriate brand communication investment was carried out to spread brand awareness, and consumer trials. Due to the intervention of the State administration in selling and dispatch of the sugar and liquidity constraints, there has been a mismatch in the supply commitments to the specialty sugar customers, which has affected the expected growth of the specialty sugar business.

In addition, the potable spirits products of the Company includes the following range: Board's Verdict Premium Whisky, Hunters Matured Rare XX Rum, Xing Vodka, Seven Knights Whisky, XXX Rum. However, during the year, the distillery operations were remain suspended due to the order passed by Hon'ble NGT and the Management has decided to discontinue the production and marketing of these products for the time being.

International Trading

During the year, the international trade was limited due to weak international prices vis-à-vis domestic market. However, the Company has continued trade with selected markets like Nepal, Canada, Hong Kong, Dubai and US. Trust branded sugar has been receiving favorable response from the destinations like Canada and Pacific Islands. L-Grade sugar has established unique place in Canadian market and its volume is growing every year. During the year, the Company has exported 5500 MT sugar under Open General License Scheme. The Company is also exporting Extra Neutral Alcohol (ENA) to various African destinations to generate additional income.

Human resources

The Company follow the fundamental principles of human and workplace rights in all its businesses, which has led to managing a committed and motivated work force. A number of employees' participation and welfare programs have been carried out during the year. Keeping the philosophy of continuous training and job improvements, the Company has imparted 615 man days of training apart from the regular on the job trainings to its employees. The relation between the management and employees continued to remain cordial at all the locations. The manpower has also been rationalized with the transfer of employees to diversified businesses.

The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the

financial statements are consistent with those followed in the previous year.

ii) Use of Estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management of the Company to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results would differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known/ materialise.

iii) Fixed assets

Fixed assets are stated at cost less accumulated depreciation. Cost is inclusive of freight, duties, taxes, other incidental expenses and, financing cost relating to borrowed funds attributable to construction or acquisition of fixed assets, up to the date the assets are ready for their intended use.

iv) Capital work-in-progress

Projects under which tangible fixed assets are not yet ready for their intended use are carried at cost, comprising direct cost, related incidental expenses and attributable interest.

v) Impairment

At each Balance Sheet date, the Company reviews the carrying amounts of its assets to determine whether there is any indication that those assets suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using an appropriate discount rate that reflects the current market assessments of time value of money and the risks specific to the asset.

vi) Depreciation/ Amortisation

In respect of tangible assets, the depreciation is provided by applying the following method at the rates specified in schedule II to the Companies Act, 2013:

- All Depreciable Fixed Assets except Vehicles	-	Straight line method
- Vehicles	-	Written down value method

except in the case fixed assets costing up to Rs. 5,000 are fully depreciated in the year of acquisition.

vii) Leases

Where the Company as a lessor leased assets under finance leases, such amounts are recognised as receivables at an amount equal to the net investment in the lease and the finance income is recognised based on

a constant rate of return on the outstanding net investment.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals under operating leases are recognised in the Statement of Profit and Loss on a straight-line basis.

viii) Investments

Long term investments are stated at cost as reduced by provision for diminution, other than temporary, in the value, if any.

ix) Inventories

Inventories are valued at the lower of cost and net realizable value. The bases of determining cost for different categories of inventory are as follows:

Stores and spare parts	-	Monthly weighted average.
Raw materials	-	First in first out (FIFO)
Process stocks/finished goods	-	FIFO material cost plus appropriate share of labour and manufacturing overheads.
Stock in trade	-	First in first out (FIFO)
By products	-	At estimated realizable value

x) Cash and cash equivalent

Cash comprises of cash in hand and term / demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

xi) State excise duty

The state excise duty payable on potable alcohol is accounted for on the clearance of goods from the factory premises or bonded warehouses. The amount of state excise duty payable on alcohol not cleared from the factory premises and bonded warehouses as at the year end is not determinable as it varies according to the places to which the goods will be dispatched. However, non provision of this liability does not affect the profit/loss of the year.

xii) Employee benefits

A. Short term employee benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, allowances, etc., are recognised as an expense at the undiscounted amount in the Statement of Profit and Loss of the year in which the employee renders the related service.

B. Post employment benefits

(a) Defined contribution plans

The Company's contribution to provident fund, super annuation scheme, etc. are considered as defined contribution plans and are charged as an expense as it falls due based on the amount of contribution required to be made and when services are rendered by the employees.

(b) Defined benefit plans

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined

using the Projected Unit Credit Method with actuarial valuations being carried out at each balance sheet date. Actuarial gain and losses are recognized immediately in the Statement of Profit and Loss in the period in which they occur. Obligation is measured at the present value of estimated future cash flows using a discounted rate that is determined by reference to market yields at the Balance Sheet date on Government Securities as reduced by the fair value of scheme assets.

C. Other long-term employee benefits

Long-term Compensated Absences and Long Service Awards are provided for on the basis of an actuarial valuation, using the Projected Unit Credit Method, as at the date of the Balance Sheet. Actuarial gains / losses comprising of experience adjustments and the effects of changes in actuarial assumptions are immediately recognised in the Statement of Profit and Loss. Obligation is measured at the present value of estimated future cash flows using a discounted rate that is determined by reference to market yields at the Balance Sheet date on Government Securities

Monetary assets and liabilities denominated in foreign currency, remaining unsettled at the period end are translated at closing rates. The difference in translation of monetary assets and liabilities and realised gains and losses on foreign currency transactions are recognised in the Statement of Profit and Loss.

(b) Forward exchange contracts other than those entered into to hedge foreign currency risk of firm commitments or highly probable forecast transactions are translated at period end exchange rates. Premium or discount on such forward exchange contracts is amortised as income or expense over the life of the contract.

(c) Realised gain or losses on cancellation of forward exchange contracts are recognised in the Statement of Profit and Loss of the period in which they are cancelled.

(d) Exchange differences in respect of other unexpired foreign currency derivative contracts, which have been entered into to hedge foreign currency risks are marked to market and losses, if any, are recognised in the Statement of Profit and Loss.

xvi) Borrowing costs

Borrowing costs include interest, amortisation of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are

regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss. Borrowing costs, allocated to and utilised for qualifying assets, pertaining to the period from commencement of activities relating to construction / development of the qualifying asset upto the date of capitalisation of such asset is added to the cost of the assets. Capitalisation of borrowing costs is suspended and charged to the Statement of Profit and Loss during extended periods when active / continuous development on the qualifying assets is interrupted.

xvii) Government grants

Government grants are recognized where there is reasonable assurance that the condition attach to them will be complied and the grants will be received. Government grants are accounted for as under:

Government grants of the nature of promoters' contribution are credited to the capital reserve and treated as a part of the Shareholder Fund.

Government grants related to specific depreciable fixed assets are adjusted with the value of assets. Government grants related to the specific non-depreciable fixed assets are credited to capital reserve.

Government grants that are receivable as compensation for expenses or losses incurred or for the purpose of giving immediate financial support are either deducted from the expenditure in case these relate to specific expenditure and in other cases, are treated as other income. These grants, if available, to the industry in general are treated as ordinary items and if available only to the company are treated as an extraordinary item and disclosed accordingly

xviii) Taxation

Provision for current taxation is ascertained on the basis of assessable profits computed in accordance with the provisions of the Income-tax Act, 1961.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed

depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

xix) Earnings per share

Basic earnings per share are computed by dividing the profit/(loss) after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share are computed by dividing the profit/(loss) after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares

xix) Securities issue expenses

Securities issue expenses (net of tax) are adjusted from the securities premium account as permissible under Section 52 of the Companies Act, 2013.

xx) Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

xxi) Operating Cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

11. Segment reporting

A. Business segments:

Based on the guiding principles given in Accounting Standard AS-17 "Segment Reporting", the Company's primary segments are business segments, viz. Sugar and Alcohol.

B. Geographical segments:

Since the Company's activities/operations are primarily within the country and considering the nature of products it deals in, the risks and returns are same and as such there is only one geographical segment.

C. Segment accounting policies:

In addition to the significant accounting policies applicable to the business segments as set out in note 2 above the accounting policies in relation to segment accounting are as under:

a) Segment revenue and expenses:

Joint revenue and expenses of segments are allocated amongst them on a reasonable basis. All other segment revenue and expenses are directly attributable to the segments.

b) Segment assets and liabilities:

Segment assets include all operating assets used by a segment and consist principally of operating cash, debtors, inventories and fixed assets, net of allowances and provisions which are reported as direct offsets in the balance sheet. Segment liabilities include all operating liabilities and consist principally of creditors and accrued liabilities. Segment assets and liabilities do not include income taxes. While most of the assets/liabilities can be directly attributed to individual segments, the carrying amount of certain assets/liabilities pertaining to two or more segments is allocated to the segments on a reasonable basis.

c) Inter segment sales:

Inter segment sales between operating segments are accounted for at market price. These transactions are eliminated on consolidation.

The respective Board of Directors of the Holding Company, its subsidiary companies and jointly controlled companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the "Guidance Note on Audit of Internal Financial Controls Over Financial Reporting" (the Guidance Note") issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective

company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility :

Our responsibility is to express an opinion on the Company's internal financial control over financial reporting based on our audit. We believe that the audit evidence, we have obtained and the audit evidence obtained by the other auditors of the subsidiary companies and its joint controlled companies, which are companies incorporated in India, in terms of their reports referred to in the Other Matters Paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the Company's Internal Financial Control System over Financial Reporting.

Meaning of Internal Financial Controls over Financial Reporting :

A company's internal financial controls over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statement for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and disposition of the assets of the company; (2) provide reasonable assurance that transaction are recorded as necessary to permit preparation of financial statement in accordance with generally accepted accounting principles, and that receipt and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statement.

Inherent Limitations of Internal Financial Controls over Financial Reporting :

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material mis-statements due to error or fraud may occur and not be detected.

Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial controls over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

viii) Investments

Long term investments are stated at cost as reduced by provision for diminution, other than temporary, in the value, if any.

ix) Inventories

Inventories are valued at the lower of cost and net realizable value. The bases of determining cost for different categories of inventory are as follows:

Stores and spare parts	-	Monthly weighted average.
Raw materials	-	First in first out (FIFO)
Process stocks/finished goods	-	Material cost plus appropriate share of labour and manufacturing overheads.
Stock in trade	-	First in first out (FIFO)
By products	-	At estimated realisable value

x) Cash and cash equivalents

Cash comprises of cash in hand and term / demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

xi) State excise duty

The state excise duty payable on potable alcohol is accounted for on the clearance of goods from the factory premises or bonded warehouses. The amount of state excise duty payable on alcohol not cleared from the factory premises and bonded warehouses as at the year end is not determinable as it varies according to the places to which the goods will be dispatched. However, non provision of this liability does not affect the profit/loss of the year.

xii) Employee benefits

A. Short term employee benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, allowances, etc., are recognised as an expense at the undiscounted amount in the Statement of Profit and Loss of the year in which the employee renders the related

service.

B. Post employment benefits

a) Defined contribution plans

The Company's contribution to provident fund, super annuation scheme, etc. are considered as defined contribution plans and are charged as an expense as it falls due based on the amount of contribution required to be made and when services are rendered by the employees.

b) Defined benefit plans

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit Method with actuarial valuations being carried out at each balance sheet date. Actuarial gain and losses are recognized immediately in the Statement of Profit and Loss in the period in which they occur. Obligation is measured at the present value of estimated future cash flows using a discounted rate that is determined by reference to market yields at the Balance Sheet date on Government Securities as reduced by the fair value of scheme assets.

C. Other long-term employee benefits

Long-term Compensated Absences and Long Service Awards are provided for on the basis of an actuarial valuation, using the Projected Unit Credit Method, as at the date of the Balance Sheet. Actuarial gains / losses comprising of experience adjustments and the effects of changes in actuarial assumptions are immediately recognised in the Statement of Profit and Loss. Obligation is measured at the present value of estimated future cash flows using a discounted rate that is determined by reference to market yields at the Balance Sheet date on Government Securities

xiii) Revenue recognition

Sales are recognized, net of returns and trade discounts, on transfer of significant risk and rewards of ownership to the buyer, which generally coincides with the dispatch of goods to customers. Sales include excise duty but exclude sales tax and value added tax.

Revenue from power generation is recognised on accrual basis as per terms of Power Purchase Agreement with Uttar Pradesh Power Corporation Limited.

Income from REC is recognized to the extent approved and credited in company's favour by concerned authority in the account maintained with Renewable Energy Certificate Registry of India at the minimum expected realizable value, determined based on the rates specified under the relevant regulations. Since there is no uncertainty in realizing the same. The difference between the amount recognized initially and the amount realized on sale of such RECs at the Power Exchange are accounted for as and when such sale happens.

Management fee income is accrued as per contractual terms.

xiv) Interest income

Interest income is recognized on a time proportion basis.

xv) Foreign Currency Transactions and Forward contracts

a) Transactions in foreign currency are recorded at exchange rates prevailing on the day of the transaction. Monetary assets and liabilities

denominated in foreign currency, remaining unsettled at the period end are translated at closing rates. The difference in translation of monetary assets and liabilities and realised gains and losses on foreign currency transactions are recognised in the Statement of Profit and Loss.

b) Forward exchange contracts other than those entered into to hedge foreign currency risk of firm commitments or highly probable forecast transactions are translated at period end exchange rates. Premium or discount on such forward exchange contracts is amortised as income or expense over the life of the contract.

c) Realised gain or losses on cancellation of forward exchange contracts are recognised in the Statement of Profit and Loss of the period in which they are cancelled.

d) Exchange differences in respect of other unexpired foreign currency derivative contracts, which have been entered into to hedge foreign currency risks are marked to market and losses, if any, are recognised in the Statement of Profit and Loss.

e) In case of foreign subsidiary, the assets and liabilities have been translated into Indian Rupees at the closing exchange rate at the year end whereas revenues and expenses reflected in the Consolidated Statement of Profit and Loss have been translated into Indian Rupees at monthly average exchange rate for the reporting period. The resultant translation exchange differences are accumulated in "Foreign currency translation reserve" to be recognised as income or expense in the period in which net investment in concerned foreign subsidiary is disposed off.

xvi) Borrowing costs

Borrowing costs include interest, amortisation of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss. Borrowing costs, allocated to and utilised for qualifying assets, pertaining to the period from commencement of activities relating to construction / development of the qualifying asset upto the date of capitalisation of such asset is added to the cost of the assets. Capitalisation of borrowing costs is suspended and charged to the Statement of Profit and Loss during extended periods when active / continuous development on the qualifying assets is interrupted.

xvii) Government grants

Government grants are recognized where there is reasonable assurance that the condition attach to them will be complied and the grants will be received. Government grants are accounted for as under:

Government grants of the nature of promoters' contribution are credited to the capital reserve and treated as a part of the Shareholder Fund.

Government grants related to specific depreciable fixed assets are adjusted with the value of assets. Government grants related to the specific non-depreciable fixed assets are credited to capital reserve.

Government grants that are receivable as compensation for expenses or losses incurred or for the purpose of giving immediate financial support are either deducted from the expenditure in case these relate to specific expenditure and in other cases, are treated as other

income. These grants, if available, to the industry in general are treated as ordinary items and if available only to the company are treated as an extraordinary item and disclosed accordingly.

xviii) Taxation

Provision for current taxation is ascertained on the basis of assessable profits computed in accordance with the provisions of the Income-tax Act, 1961.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

xix) Earnings per share

Basic earnings per share are computed by dividing the profit/(loss) after tax by the weighted average number

of equity shares outstanding during the period. Diluted earnings per share are computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

xx) Securities issue expenses

Securities issue expenses (net of tax) are adjusted from the securities premium account as permissible under Section 52 of the Companies Act, 2013.

xxi) Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

xxii) Operating Cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.
